SUBJECT: Corrective Actions taken due to recent Notice of Violation. (MAINTENANCE PLAN)

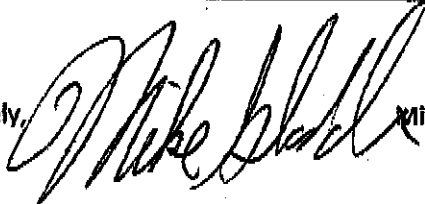

Dear Mr Wagner,

In order to become compliant with 15A NCAC 13B.0510(c), please accept the following plan of action taken, along with a maintenance plan to maintain the final cover of the closed landfill.

- 1: All trees and woody vegetation has been removed from the cap. We are currently hauling the material away to our wood waste facility on site. I estimate about one to two weeks to complete this weather permitting.
- 2: We will haul soil in to all eroded area's immediately after removal of the woody vegetation. The diversionary berms will be rebuilt and maintained until vegetation returns in early spring of 2015.
- 3: After the soil is hauled in, we will mow the remainder of the footprint once again this winter and sow grass in early spring of 2015.
- 4: Once we have a clear view of the footprint with all repairs made, we will re-install all area markers to show the footprint on ground.
- 5: At minimum, we will complete a walk around inspection four times per year and document what we find along with repairs made each visit.
- 6: The landfill area will be mowed four times in a year at least with additional mowing as we need to.

After your review of this plan, if you have any questions or concerns, please contact me at 828-659-2521 or e-mail at mike.gladden@mcdowellgov.com

Sincerely,

Mike Gladden, Director of Public Works for McDowell County
